

Display Central

+ For a full overview

The screen-only Display Central takes readability to the max under any conditions. Its 3.5-inch, high-definition colour screen lets cyclists take in all the stats at a glance. The Display Central features a backlight function for optimum readability in both darkness and direct sunlight. The screen brightness can be adjusted either manually or in automatic mode.

Thanks to the central position on the handlebar, the e-biker always has a perfect view of the personalised values on the display. The Display Central is ergonomically controlled via the Remote, whose LEDs are switched off in this combination to prevent redundant information. It has a direct connection to the digital Service Tool, enabling quick and easy diagnosis and maintenance by certified dealers.

Product name	Display Central
Part number	E41229
Display	3,5" colour display (320 × 240 px)
Dimensions L/H/W (mm)	84 × 70 × 13
Diameter handlebar	31.8 mm
Weight	70 g
Electrical data	12 V / max. 3 W
Operating and storage temperature	-10 °C bis +60 °C
Protection class	IPX7 (HMI) waterproof
